WORK EXPERIENCE

Josla Electricity

Frontend Developer - Full Time

May 2020 - August 2022

- I worked on building an MVP for the core application
- I worked on making the application's design responsive across all screens.
- I worked on using very optimal state management patterns to cache data to better enhance the user experience.
- I worked on integrating the frontend with a payment provider solution.
- I worked on writing clean and efficient code in order to create a platform for users to view and optimise their energy consumption.

ChainWhiz

Frontend Developer - Contract

August 2022 - December 2022

- I worked on developing a mobile responsive landing page.
- I worked on development of the MVP of the application.
- I worked on integrating the application with the smart contracts created to facilitate it from the blockchain.
- I worked on creating pixel perfect replica of the application directly from the figma design shared.
